CONSOLIDATED MAIL OUTPATIENT PHARMACY (CMOP)

USER MANUAL

Version 2.0
April 1997

(Revised September 2002)

Department of Veterans Affairs
VIST**A** System Design & Development

Revision History

Any changes subsequent to the initial release of this manual are listed below. The users should update the manual with the pages listed under the Revised Pages column. Pages listed in parentheses are unchanged but included for two-sided copying.

Date	Revised Pages	Patch Number	Description
09/02	Title Page; i-(ii); 65-66.	PSX*2*34	Updated Title Page and Revision History; modified description of Unreleased Rx's Report to include new sort and print options. Formatting change unrelated to the patch: Header for example of Rejected Messages Report moved to same page as body of report.
05/02	Title Page; i-viii; (61)-62; 67-(68).	PSX*2*32	Updated Title page; added Revision History page and renumbered Preface and Table of Contents pages; added new CMOP DRUG Cost Missing report; and amended Facility Activity Report description to add time range. Screen captures on updated pages re-formatted to new standards.
12/97			Original Released User Manual.

(This page left blank for two-sided copying)

```

Unreleased Rx's Report

With this option the user can print a summary of all prescription data in the CMOP Master Database that have not been released. The summary contains the facility, pharmacy division, date transmitted and received, the Rx number, drug ID, and the number of fills. The report will sort by the order number within the batches displayed. This report can be printed for a selection of date ranges, facilities, and type of transmissions (Controlled Substances and Non-Controlled Substances).

Duplicate Release Data Report

This report may be accessed in one of two ways.

1) When the system automatically detects duplicate Rx's, an alert is generated. Processing this alert will cause the report to print. Answering yes to the "Delete these Rx's" release data purge prompt found at the end of the report will mark these Rx's for deletion by the background filer.

2) The report can also be generated by using the option "PSX DUPLICATE RX PURGE". This option performs the same function as #1 except it gives the user the chance to access the list of duplicates when necessary and not just when an alert is generated.

Example: Duplicate Release Data Report

```
Select CMOP System Management Menu Option: Duplicate Release Data Report
DEVICE: [Select Print Device]

                          Duplicate Rx Report
                            BIRMINGHAM, AL.
